

## Technical sheet Cardboard Xmas Tree

### Materials:

- used cardboard boxes
- cutting lat
- wooden flower stick
- nylon wire
- hook (to hang the Xmas tree)
- 2 toothpicks

### Instructions:

- cut 33 slats about 35cm wide and 2cm high from the cardboard boxes.  
Repeat this 3 times (3x33)
- cut 6 mm (3 mm each side) of the edges per 3 slats.
- perforate a hole in the middle with flower stick
- stack the 3 equal slats from wide to narrow
- push the flowerstick through the holes
- press the cardboard slats well together before fixing them
- make a tiny whole in the top and bottom of the flower stick and push a toothpick through to fix the slats
- hang the tree with a nylon wire on the hook
- slide each slat slightly forward and create a spiral from the bottom up

Congratulations, you can now enjoy a sustainable, circular Xmas tree for which we and nature are grateful!

Nnof, Transmoove, Nnofcare and the Be-One Communication team wish you fabulous Xmas days!
